*Oracle University provides in-depth, world-class training on Primavera Project Management (PM) and Enterprise Project Portfolio Management (EPPM) applications so that you can make better portfolio management decisions, evaluate the risks and returns associated with projects, and determine whether there are sufficient resources with the right skills to accomplish the work. The curriculum is designed to teach your team how to efficiently and effectively implement and use your Primavera EPPM applications.*

The following courses are a sample of the Primavera training portfolio. In addition to the courses listed here, training is also available for Release 7.0 of Primavera's Web-based application and Release 7.0 of Primavera's Windows-based application. To view the entire portfolio, details about specific courses, schedules and learning paths, visit: [oracle.com/education/primavera](https://oracle.com/education/primavera)

### P6 Enterprise Project Portfolio Management

**Primavera P6 Rel 8.0 Fundamentals** (5 day course): This course for end-users covers basic project management functionality, from project creation through execution and control, in Primavera's Web-based application. Among the topics covered are: Creating a project; building a Work Breakdown Structure; adding activities and relationships; scheduling; assigning resources; base-lining and optimizing; executing the project and resolving schedule delays.

**Managing Portfolios in Primavera P6 Rel 8.0** (1 day course): This course for end-users and program team members covers portfolio management and analysis, focusing on the Portfolios section in Primavera's Web-based application. Topics include: Creating portfolios; viewing return-on-investment data; earned value analysis; capacity planning; and waterline analysis.

**Installing and Configuring Primavera P6 EPPM Rel 8.1** (2 day course): This course is for system administrators, implementation team members and IT staff interested in learning how to install Primavera P6 and the core components Progress Reporter and Optional Client. Also learn how to integrate with middleware components such as Oracle Universal Content Management (UCM), Oracle Business Intelligence Enterprise Edition (OBIEE) and BI Publisher. You will perform a full installation of P6, and then integrate that installation with the other applications.

**Application Administration in Primavera P6 R8.x** (2 day course): This course is for application administrators and team members interested in learning how to use Primavera's Web-based application to create structures and configure data to support an enterprise implementation of P6. Topics include: Building the Enterprise Project Structure and Organizational Breakdown Structure; creating users and configuring security; adding roles and resources; creating enterprise data; and supporting the organization in creating, managing, and analyzing projects.

### P6 Professional Project Management

**Managing Resources in Primavera P6 Professional Rel 8.0** (2 day course): This course for end-users covers resource management functionality, including creation of resources and roles and advanced strategies for managing allocation, in Primavera's Windows-based application. Topics include: Assigning calendars; bucket planning; leveling resources; and resource reporting.

**Managing Projects in Primavera P6 Professional Rel 8.0** (5 day course): This course is for end-users and covers basic and advanced project management functionality, from project creation through execution and control, in Primavera's Windows-based application. Among the topics covered are: Creating a project; building a Work Breakdown Structure; adding activities and relationships; scheduling; assigning resources; base-lining and optimizing; executing the project and resolving schedule delays.

### Portfolio Management

**Primavera Portfolio Management Rel 7.0** (3 day course): This course for end-users covers key portfolio management concepts, including portfolio management operating structures, governance structures, and business processes. Among the topics covered are: Creating scorecards, query based portfolios, investor maps, and dashboards; configuring the analytical environment to evaluate each investment; and configuring views for executives.

### P6 Analytics

**Primavera P6 Analytics Rel 8.x** (2 day course): P6 Analytics integrates P6 data with the Oracle Business Intelligence platform. Learn how to build tables, charts, and reports to analyze P6 data, and how to view pre-configured reports and dashboards. Among the topics covered are: Creating basic requests; filtering; creating charts and working with gauge views; viewing dashboards; and using BI Publisher and BI Delivers.

### Contract Management

**Primavera Contracts Management Rel 13** (3 day course): Learn to use Primavera Contract Management, focusing on project cost control and document management. Topics include: Logging and tracking submittals; recording project communication; awarding procurement items; recording and viewing drawing logs; and using contracts, purchase orders, and trends.

### Risk Management

**Managing Risk in Primavera Risk Analysis Rel 8.6** (3 day course): This course for end-users provides a thorough background in the basic concepts of risk management and risk modeling techniques. Among the topics covered are: Using a risk register to assess risks qualitatively or quantitatively; running a risk analysis; and proposing, evaluating, and justifying mitigation.
