PRIMAVERA PORTFOLIO MANAGEMENT 9.0 SP1 PLATFORM REQUIREMENTS

The following table describes the platform requirements for Oracle's Primavera Portfolio Management 9.0 SP1.

Primavera Portfolio Management Platform Requirements		
Servers		
• Microsoft Windows Server platform for the installation of the Primavera Portfolio Management application server		
• Virtual operating systems as per the requirements below; installation on virtual operating systems other than those listed is *not* supported for production		
• Database server as per database vendor recommendations (can coexist with the Primavera Portfolio Management application server on one machine for small installations)		
Virtual Operating Systems		
VMware ESXi 4.1 Update 1		
Server Operating Systems and Utilities		
• Windows Server 2003 SP2 (32-bit or 64-bit, but NOT Itanium) or Windows Server 2008 SP2 (32-bit or 64-bit, but NOT Itanium) or Windows Server 2008 R2 SP1 (64-bit, but NOT Itanium) with critical updates		
• On Microsoft Windows Server 2003 SP2:		
○ Microsoft Internet Information Services 6.x with SMTP Service		
○ Microsoft Distributed Transaction Coordinator 5.2.3790.3959 (installed with Microsoft Windows Server 2003 SP2) or later		
• On Microsoft Windows Server 2008 SP2 or 2008 R2 SP1:		
○ Microsoft Internet Information Services 7.x		
○ Microsoft SMTP Server		
○ Microsoft Distributed Transaction Coordinator 6.0.6001.18000 (installed with Microsoft Windows Server 2008) or later		
• Microsoft .NET Framework 2.0 SP2 and 3.5 SP1 (installed by Primavera Portfolio Management)		
Client Operating Systems and Utilities		
• Windows XP SP3		
• Windows Vista SP2		
• Windows 7		
Browsers	• Microsoft Internet Explorer 7.0 • Microsoft Internet Explorer 8.0 • Microsoft Internet Explorer 9.0	
Microsoft Office	• Office 2003 SP3 • Office 2007 SP2	
Minimum client	• Pentium 4, 1GHz or higher • 512MB RAM or higher as required by client OS	

Primavera Portfolio Management Platform Requirements (cont.)
Databases Supported on Microsoft Windows Server
• Microsoft SQL Server 2005 SP4 Standard and Enterprise Editions (x86/x64 as appropriate for the server)
• Microsoft SQL Server 2008 SP1 Standard and Enterprise Editions (x86/x64 as appropriate for the server)
• Microsoft SQL Server 2008 R2 Standard and Enterprise Editions (64-bit only)
The appropriate Microsoft SQL Server client software (of the same version and service pack level as the database server used and x86 or x64 as appropriate) must be installed on the Microsoft Windows Server(s) which has/have Primavera Portfolio Management on it, prior to the installation of Primavera Portfolio Management.
Databases Supported on Sun Solaris 10 10/09 or Microsoft Windows Server
• Oracle Database 10g Release 2, Enterprise Edition (version 10.2.0.5)
• Oracle Database 11g Release 2, Enterprise Edition (version 11.2.0.2)
The Oracle 11.2 InstantClient database client software is automatically installed during the installation of Primavera Portfolio Management.
Primavera P6 Enterprise Project Portfolio Management Integration (Optional)
• Primavera P6 v6.2.1
• Primavera P6 v7.0
Required components:
▪ Project management
▪ Methodology management
▪ Job Service
▪ Primavera P6 Web Services
For P6 v6.2.1: the P6 Web Services must be running on a separate instance of a supported Web application server (JBoss, Apache, IBM WebSphere, Oracle WebLogic Server)
• Primavera P6 v8.0 or v8.1 or 8.2
Required components:
▪ Project management
▪ Primavera P6 Web Services
Microsoft Project Server 2007 Integration (Optional)
• Project Professional 2007 SP2
• Project Server 2007 SP2
